

# A-Frame Prostock Structure

**Our A-frame Prostock structures are designed for a semi- to permanent use, with reduced civil works and no building permits.**

Fully customisable, our Prostock structures are extremely versatile and can be used for many purposes: accommodation hall, storage warehouse, hospital, catering facility, distribution center, etc. Prostock tents are made of an extruded aluminum or steel frame and a flame-retardant, PVC-coated roof cover. The walls can be made with PVC fabric, single sheet metal cladding or sandwich panels. Sandwich panels are available in different thicknesses depending on the desired insulation and acoustic performance. All base plates and mounting parts are made with galvanized steel for extra robustness. Prostock structures are equivalent to permanent buildings in terms of operating conditions, with outstanding thermal and sound-proofing properties. Besides, they offer extra benefits in terms of installation and maintenance costs and size modularity. Worldwide service and assistance are provided by our specialised technicians.

#### Available options:

- White translucent or opaque cover
- Internal insulated separation walls
- Rigid access doors, for trucks or personnel
- Insulated windows
- Lighting
- Electrical wiring
- Heating
- Air conditioning
- Ventilation
- False ceiling, awning, interior insulation
