

LOSBERGER DE BOER

Losberger De Boer Industrial Aircraft Hangars

Hangars for Storage and Maintenance

Do you need more storage space for aircraft? Does your commercial fleet need room to grow or be maintained? Our industrial aircraft hangars are designed for airports and aviation companies looking to expand operations or increase maintenance capacity.

Quick and Easy Setup

Our hangars require no foundations and can be installed rapidly with minimal ground preparation. Pre-mounted structural elements and easy-to-install keder rims streamline the process, reducing the need for heavy machinery and large crews.

On-Time, On-Budget Delivery

We commit to delivering projects on schedule and within budget, avoiding unexpected costs. Our transparent pricing ensures there are no hidden fees.

Our Certifications:

Customizable and Adaptable Solutions

Our hangars can be easily extended, scaled up or down, or relocated to meet changing operational needs. We tailor them to your specific requirements in terms of size, shape, and door types, ensuring they fit various aircraft types and withstand local weather conditions.

Expertise in Aviation-Specific Challenges

We offer specialized features such as custom-built nose cone doors and T-shaped empennage doors to optimize space usage and facilitate maintenance. Our experience with restrictive airport environments ensures minimal disruption to operations.

High-Quality and Sustainable Construction

We use high-grade materials like anodized aluminium, galvanized steel, and double-sided PVC coated polyester fabric to ensure durability. Our structures can last up to 30 years, with options to extend their lifecycle through cover replacements.

Environmental and Employee Friendliness

As an ISO 14001 certified company, we use environmentally friendly materials and processes. Our designs and processes ensure a safe and comfortable working environment. When your hangar is no longer needed, materials can be refurbished and reused in other structures, maximizing resource efficiency.

Always an Optimal Work Situation

We understand that every operation has unique needs. That's why we offer versatile structures for our industrial aircraft hangar solutions. Whether for maintenance, storage, or operations, our three building types can be fully customised to meet your requirements. Our commitment to tailor-made solutions ensures each structure is optimised for your operational demands, providing flexibility, durability, and efficiency.
